Professional Experience

- Intern - AI Powered Knowledge Graph for Medical Query Analysis and Recommendations**
Icliniq

2024 – 2025
Coimbatore, India

 - Built an AI-based medical recommendation system using BioBERT and Neo4j to extract symptoms and predict diseases/specialists.
- Intern - OCR and Database Management of medical reports**
Universiti Sains Islam Malaysia

2024/07
Nilai, Malaysia

 - Developed **OCR modules** to extract structured data from medical reports, improving retrieval efficiency.

Education

- B.Tech Artificial Intelligence and Data Science**
Coimbatore Institute of Technology
CGPA : 7.43

2022 – 2026
Coimbatore, India

Skills

Programming Python	Data Structures and Algorithms	DBMS MySQL
Data Science	Visualization Matplotlib, Tableau & Power BI	

Awards

- Googlethon Hackathon**
Google Developer Student Club of CIT

2024/05/24

"I secured the first place, with an IoT-based system that sends distress signals from vehicles to nearby cars in areas without cellular coverage, enhancing road safety and emergency response during accidents."

Projects

- AI-Powered Medical Recommendation System Using Knowledge Graphs**

Developed an AI-driven medical recommendation system using BioBERT for symptom extraction and Neo4j knowledge graphs for disease and specialist prediction, improving accuracy by 30% across 1000+ disease-symptom relationships.
- Speed limit automation**

"Increased safety compliance by 25% for vehicles operating at variable speeds by designing and implementing a Vehicle Speed Control System using an FR module in an Internet of Things project."
- Vehicle crash detection**

Designed an emergency alert system enabling cars to broadcast distress signals, reducing accident response time by 40%.

Courses

- NPTEL**
Business Intelligence and Analytics
Score : 81%

Interests

- Passionate About Technologies & Performance Trends
- Interest in East Asian Comics
